

Dr Turner

I want to thank you for all you have done for me. I have a part of my life back that had been taken away and it's because of you, your knowledge and dedication to helping people. I had always been a person that was always busy doing something then this 'fibromyalgia' knocked me in the dirt and literally changed my life from day to night. I went from working full time and then some, remodeling houses, building a farm, working and riding my horses, keeping up with my son and all the house duties to having to hire a house keeper, not being able to work, I made a deal with a neighbor to get help with the horses, and so on. Some days I couldn't even walk the 150 foot to the barn let alone carry water buckets and brush the horses or whatever needed done. If I rode a horse it was only because someone else brought them in, brushed and saddled them and, after I rode for 10 to 20 minutes tops, they had to take the horse and unsaddle, brush them and put the horse back out for me. That was if I was having a good day. August and September was the beginning of feeling better. I have been able to do my own saddling and ride for an hour to an hour and a half a couple times a week now. I can go to Wal-Mart and the grocery store in one day now, before I had to do one store one day and another store the next, if I could. I recently took a two and a half day motorcycle riding safety class and I know beyond a shadow of a doubt I would never have made it through the first full day just a few months ago. I'm still a long way from being back to normal but I have improved enough that I can actually enjoy myself a little bit now and I have you to thank for this. I don't know the words to express my gratitude other than Thank You, Thank You, Thank You!!! May God bless you for what you have done for me and, I'm sure, many many others.

Sincerely,
Nancy (last name omitted)
