

I met Dr. Turner and his staff in the summer of 2011. Not only did he take the time to get to know me. He and his team changed my life, the weight loss was remarkable. But even that isn't as moving as the chronic pain relief. Dr. Turner and his staff accomplished what surgery and excessive amounts of pain medication had only provided minimal relief. After just 6 months my chronic pain was gone! and even now in 2013 it has never returned. I truly believe that the weight loss and the testosterone treatments are the reason. Thanks to Dr. Turner and all of his staff, i now live a pain free life!
