

Opiate addiction/outpatient detox

"This place saves lives. Initially it's expensive but free the first month of accountability and properly medicating you notice a great change in your life".

The first visit is an hour with a counselor and a physician and costs \$250. Subsequently the cost is \$200 per month. This is for intense outpatient detox over a period of 6 to 8 weeks. I can guarantee you this is extremely inexpensive for a detox program; especially one that is as effective as the one we have at Innovative Medicine.
