

I am indebted to Dr. Turner for treating me "innovatively" when we lived in Lafayette (we moved to Michigan in 2010). He "saved my life" following a thyroidectomy by suggesting I switch from pharmaceutical hormone replacement (which wasn't working well and left me feeling devoid of energy) to Armour and additional T3. Thank you, Dr. Turner, for restoring my quality of life! And also.... I'm writing today to say thank-you for the wonderful educational material you have on your web site. My husband is currently doing the HCG protocol prescribed by a DO (and are grateful!), but we've had little assistance from him. As a result, we're self-educating, and your information here is invaluable!! Thank you so much for serving the Lafayette community, and beyond, and being willing to step "outside the box" to offer help that really helps. :-)
